## INVESTMENT DISCIPLINE

David Fingold employs a deliberately different, disciplined and opportunistic approach to investing and targets companies with high free cash flow generation, dividend growth and strong balance sheets.

Jason Gibbs and Bill McLeod follow a capital protection philosophy in targeting primarily high quality "best-in-class" Canadian businesses with sustainable dividend income and the potential for dividend growth.

Ryan Nicholl and Tom Dicker take a quality-value approach to stock selection that places emphasis on bottom-up fundamental research and valuation. They seek to invest in dividend-paying U.S. companies that are dominant within their industries thanks to enduring competitive advantages, strong balance sheets and best-in-class management teams.

Marc-André Gaudreau offers exposure to a broad range of credit asset classes using a rigorous security selection process and a full range of risk management tools to protect capital.

Derek Amery focuses on high quality Canadian issuers. He tactically manages duration, sector allocation and foreign currency exposure utilizing a broad range of risk management tools.

Romas Budd uses a combination of investment strategies to generate risk adjusted total returns through both interest income and capital gains.

The Oversight Committee is responsible for monitoring at both the manager level and the overall Pool level.

[1] For the period ended 2023-06-30. [2] This Monthly distribution is fixed but not guaranteed and may be adjusted from time to time at the discretion of the fund manager. [3] The yield is determined by annualizing the fixed distribution rate and does not include any distributions in excess of the fixed distribution rate that may be paid at the fund's year-end. [4] Risk rating measures the degree of uncertainty that an investor can handle regarding fluctuations in the value of their portfolio. The amount of risk associated with any particular investment depends largely on your own personal circumstances including your time horizon, liquidity needs, portfolio size, income, investment knowledge and attitude toward price fluctuations. Investors should consult their financial advisor before making a decision as to whether this pool is a suitable investment for them.

Distributions may consist of net income, dividends, net realized capital gains, and/or return of capital. Distributions are not guaranteed and investors should not confuse a fund's distribution yield with its performance or rate of return.

Commissions, trailing commissions, management fees and expenses all may be associated with investments in pools. Please read the prospectus before investing.

The indicated rates of return are the historical annual compounded total returns including changes in units [share] value and reinvestment of all distributions [dividends] and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values of the pool or returns on investment in the pool. Investments in pools are not guaranteed, their values change frequently and past performance may not be repeated.
