The benchmark used for analytics for this fund is MSCI ACWI Index (C$).

[1] For the period ended 2023-06-30. **[2]** Active share measures the percentage a portfolio's holdings that are different from those in its benchmark. Active share shows how the manager is actively exploiting opportunities that are not reflected in the index. **[3]** Risk rating measures the degree of uncertainty that an investor can handle regarding fluctuations in the value of their portfolio. The amount of risk associated with any particular investment depends largely on your own personal circumstances including your time horizon, liquidity needs, portfolio size, income, investment knowledge and attitude toward price fluctuations. Investors should consult their financial advisor before making a decision as to whether this mutual fund is a suitable investment for them. **[4]** Not available for purchases, switches out only.

DYNAMIC PREFERRED PRICING

Management fee rates are applied back to dollar one

Fund Value	%
$0K - $250K	2.000%
$250K - $1M	1.900%
$1M - $5M	1.825%
$5M+	1.775%

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing.
The indicated rates of return are the historical annual compounded total returns including changes in units [share] value and reinvestment of all distributions [dividends] and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values of the mutual fund or returns on investment in the mutual fund. Investments in mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
R^2 is a measurement out of 100 that shows the extent to which a portfolio's movements can be explained by the benchmark's movements.
Standard deviation is a measure of volatility; it shows how broadly the Fund's returns have varied over a given time period.
Active share measures the percentage a portfolio's holdings that are different from those in its benchmark. Active share shows how the manager is actively exploiting opportunities that are not reflected in the index.
