INVESTMENT DISCIPLINE

The Pool seeks to provide exposure to a multi-alternative portfolio with the potential to deliver low volatility U.S. exposure with competitive participation in good markets, attractive income generation potential and a systematic framework for risk-reduction in declining markets. The Pool's investment approach utilizes stocks, bonds, cash, futures and options and a focus on quality-growth at a reasonable price. The Pool is managed with a conservative approach that utilizes systematic downside protection. This aims to constrain the Pool's average volatility and potential loss to be in-line with traditional balanced funds but with less reliance on fixed income.

GROWTH OF \$150,000

[1] Formerly Alternative Managed Risk Private Pool Class [2] For the period ended 2023-06-30. [3] We review the amount of the distribution in January of each year. [4] The yield is determined by annualizing the fixed distribution rate and does not include any distributions in excess of the fixed distribution rate that may be paid at the fund's year-end. [5] Risk rating measures the degree of uncertainty that an investor can handle regarding fluctuations in the value of their portfolio. The amount of risk associated with any particular investment depends largely on your own personal circumstances including your time horizon, liquidity needs, portfolio size, income, investment knowledge and attitude toward price fluctuations. Investors should consult their financial advisor before making a decision as to whether this pool is a suitable investment for them. [6] * The portfolio protection is not included in the total asset mix weighting.

Commissions, trailing commissions, management fees and expenses all may be associated with investments in pools. Please read the prospectus before investing.

The indicated rates of return are the historical annual compounded total returns including changes in units [share] value and reinvestment of all distributions [dividends] and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. The rates of return are used only to illustrate the effects of the compound growth rate and are not intended to reflect future values of the pool or returns on investment in the pool. Investments in pools are not guaranteed, their values change frequently and past performance may not be repeated.
